Total \$ _____

The IRS allows you to deduct the fair market value of an item--that is, the price it would sell for in a thrift shop. The cost of the item when new, as well as its age and present condition, must be taken into account, when determining its value in the range noted below. The items on the list are the only items we can accept.

Here is a list to help you make this necessary inventory easier.

Women's & Junior's Clothing	Quantity	\$ Value Range	Total
